

WINTER 2012 - 2013

STANCE

Welcome to Winter 2012 - 2013

Whether you're throwing double corks in the park or destroying pillow lines in the backcountry, we've got your feet covered. Although easy to overlook, they play an essential role in your riding. That's why we create socks that keep you warm, dry, and ready to rock. Yet there's more to it than that. We also aim to blend form and function. By collaborating with our team of Punks and Poets, we craft socks as original as the riders who run them. After all, your socks should ooze with style—not sweat. At Stance, we focus on your feet so you don't have to.

THE UNCOMMON THREAD.

Stance unravels the spool of convention to create an original canvas worthy of the art it is paired with. A commune of creativity, Stance is dedicated to the spirit of individuality. Celebrate bold expression with this free-thinking fabric as it becomes thread poetry in motion. Send a crystal clear mixed message that's silently loud and quietly bold. Designed in California, worn everywhere.

PuNks & poEts

Punks, poets and personalities whose feats inspire bold individuality. Collectively, they catalyze the pursuit of creative expression as both a worthy destination and a way of life. From the streets to the mountains, the Punks & Poets serves as Stance's creative foundation. They never cease to entertain and inspire us through their actions, words, and art.

MIKEY LEBLANC

As a pro shred, entrepreneur, and designer, Mikey Leblanc has left his imprint on snowboarding's history—yet he's still going strong. Mikey laid down some of the most memorable video parts in the 90s. After founding his own streetwear and outerwear company, Holden, he also stands at the forefront of shred fashion. Mikey is nothing less than a living legend.

CHRIS GRENIER

Dirty G, Grendys, Chrissy Poo. Whatever you call him, Chris Grenier rips. With a style all his own, Chris is known for slaying handrails and forging his own path. Don't let his laid back attitude and milk mustache fool you, this kid is always ready to get down to business. With an insane part in the Transworld flick *Get Real*, Chris has earned a spot among shredding's heavy hitters.

JED ANDERSON

Jed Anderson may be just a youngster, but he's been on the shred scene for years. Thanks to solid pipe and kicker skills and a skate style perfected through countless urban assaults, Jed terrorizes every contest he enters. Watch out, he may just have to retire from shredding to pursue a career in skating.

TODD RICHARDS

Although Todd Richards was born when dinosaurs roamed the earth, he remains one of the sickest players in the game. For two decades, Todd has stood at the forefront of pipe and park progression. Despite his seven X Games medals and an Olympic pipe appearance, we hear he's even more talented at playing video games.

STEVIE BELL

Stevie Bell is easily one of the best hand-rail tricksters in snowboarding. After grabbing the spotlight in 2005, he has shown off his talents in a smorgasbord of major shred flicks. Stevie can be found stomping around the Utah backcountry with an ear to ear grin.

LNP

The first time we saw LNP on the cover of a magazine, we mistook Snowboarder for The Gypsy Journal. A few years later, it's tough not to identify LNP—and his surgically tight pants—with urban shred progression. Don't be fooled by the tie dye, kids, LNP's creativity and handrail wizardry place him in a league of his own.

JAKE OLSON-ELM

No need to clutch your purses ladies, it's not a vagrant with cool socks, it's Jake Olson-Elm! Destroying rails, killing powder lines, and never thinking once about washing his favorite pants. This Minnesota native has been around the world and back again all in the name of shred. It's shoes optional with Jake OE which makes him a perfect addition to the Stance crew.

WINTER 2012 - 2013

STANCE

WINTER 2012 – 2013

ART SERIES

Whether it's stringing together a crisp line in a pillow field or hitting a grass gap created by the spring thaw, shredding is about creativity. The socks in our Artist Series embody this same spirit, sporting the work of folks like Russ Pope. Thanks to our friends, you can now have a mini art museum in your boots.

ACRYLIC

If you view each pint of plasma you donate as a payment toward a season pass or make your meals from the condiment bar in the lodge, it's time you met the socks in our Acrylic Series. These babies will keep you warm, dry, and looking good—even with a dirtbag budget.

MERINO WOOL

Even though sheep can't press rails or float backside ones into pow, they do have one thing dialed: wool. In addition to being super soft, merino wool does an excellent job wicking moisture and regulating temperatures. We made these socks so you can rock the benefits of wool without the hassle of shredding with sheep in your boots.

PREMIUM

Our premium socks offer a buffet of technical features and fabrics. Whether it's asymmetrical fits based around the way you ride or fabrics that help maintain toasty temperatures, these socks provide unsurpassed performance. If you want tomorrow's technology today, pony up to the Premiums.

WOMENS

Sex. Okay, now that we have your attention it's time for an anatomy lesson. Compared to men, women tend to have feet that are narrower and have a shorter instep. The female calf muscle also sits lower on the leg. Needless to say, socks must be designed around these differences in order to work best. At Stance, we create a proper fit through function.

KIDS COLLECTION

Even though kids are down-sized humans, we don't downsize the performance of our kids' socks. We design them around the proportions of kids' feet and calves and blend in top-notch technology. Kids can now spend more time worrying about backside airs and book reports and less time worrying about bunched up socks.

WINTER CASUAL

After a day of charging, slip into our après shred socks. These things are comfort-driven for casual living. Whether you party in front of a wood burning stove or at the bar, your feet will thank you.

MADE IN ITALY

From fine suits to exquisite boots, Italy offers exceptional craftsmanship. Our search for the perfect sock often takes us abroad, as we proudly craft many of our socks in Italy. It's only fitting that a country shaped like a boot knows a few things about socks.

MID SIZE FIXTURE D (SNOW)

- 12 pegs
 - 144 units
 - 2 snow mannequin feet
 - 2 snow shelves
 - with removable free standing base
 - optional wall mount
-
- 13" wide
 - 12" deep
 - 66" high

MERCHANDISING

Maybe it's the thrill of something colorful, maybe it's the comfort of something soft. Whatever it is, our racks grab people's attention once they're stocked. Equally important, they help people find the perfect sock. Our countertop box also helps customers pick up some socks before they dash out the door. If you're short on space, no need to fret—we recommend converting your current casual rack into an arsenal of shred socks.

COUNTER TOP BOX*

- 25 units casual or 20 units snowboard socks
-
- 21" wide
 - 11.25" deep
 - 6.5" high

* counter top box is only available with floor fixture

FEATURES

- A ANKLE AND ARCH ELASTIC SUPPORT**

Thanks to additional elastic around the ankle and arch, you can say goodbye to sock slippage. This elastic ensures you spend more time lapping the park and less time bummed out over scrunched up socks.
- B Y GORE SEAM**

The Y Gore Seam provides the hold of a bear hug, minus the claw marks. This specially designed seam creates a deeper heel pocket to better hold your foot in place. Thanks to Y Gore, you can say goodbye to sock slip.
- C SMOOTH FLAT SEAMLESS TOE CLOSURE**

Friction is not your friend. With our socks, we eliminate the seam that is traditionally placed across the toe box. When you rock seam-free, you ride pain-free.
- D INSTEP FLEX PANEL**

When riding, your feet are always moving. Our instep flex panel adapts to these movements in order to eliminate lumpy socks.
- E LEFT AND RIGHT SPECIFIC TOE CLOSURES**

Stance socks are anatomically correct, ensuring the right fit for each foot—even the left one.
- F COMPRESSION TECHNOLOGY**

Because it might take awhile to find your physiology and anatomy coloring books, we'll spare you the tech talk. Long story short: these socks improve muscle efficiency and circulation to keep you riding strong and looking good.

- G NO LIFT HEEL GRIP**

Eliminate the lift with the grip.
- H TRACTION CONTROL**

Save the Slip and Slide for summer.
- I SNOWBOARD CUSHION PLACEMENT**

More cushion for the pushing—and for destroying rails, exploring the backcountry, lapping the park, and simply riding the chairlift. Your shins are sensitive—give them the love they deserve.
- J RAG TOP SELF-ADJUSTING WELT CUFF**

With our welt cuffs, the tops of your socks can't sneak off to the bottom of your boots.

INTERNATIONAL SIZE CHART

	KIDS	WOMENS	MENS S-M	MENS L-XL
USA	2 - 5.5	5 - 10	6 - 8.5	9 - 13

UK	1.5 - 5	2.5 - 7.5	5.5 - 8	8.5 - 12.5
JAPAN	20 - 23.5	21 - 26	24 - 26.5	27 - 31

TECHNOLOGY

NO LIFT HEEL GRIP

NO LIFT HEEL GRIP (PATENT PENDING)

Heel lift sucks. No one needs washed out turns and bruised heels. Our No Lift Heel Grip™ consists of a silicone pad printed on the Achilles tendon area of our socks. This patent pending design provides the kung fu grip you need to keep those heels locked in place.

COMPRESSION TECHNOLOGY

Our Compression socks improve the efficiency of muscles by stabilizing them and accelerating lactic acid removal and circulation. By distributing and delivering compression at the ankle and throughout the leg, these socks assist the leg's venous and lymphatic systems. This compression, when combined with the muscle pump effect of the calf, aids in circulating blood and lymph fluid throughout the legs.

TRACTION CONTROL

TRACTION CONTROL

The dozens of silicone dots printed on the bottom of our Traction Control socks ensure your feet stay locked in place in your boots. Now that you don't have to worry about bunched up socks, you just might be able to start throwing that double cork switch.

LEFT AND RIGHT SPECIFIC TOE CLOSURES

Stance socks are anatomically correct, ensuring the right fit for each foot—even the left one.

FIBER

ACRYLIC

ACRYLIC

If you view each pint of plasma you donate as a payment toward a season pass or make your meals from the condiment bar in the lodge, it's time you met the socks in our acrylic socks. These babies will keep you warm, dry, and looking good—even with a dirtbag budget.

MERINO WOOL

Wool is known for its ability to provide tremendous warmth and readily wick moisture. Even when wet, it serves as an excellent insulator, defending wearers against hypothermia. Thanks to its antibacterial properties, merino wool won't smell like a high school locker room after a few days of heavy shredding.

DRYARN

Dryarn is an innovative polypropylene microfiber. It insulates while also creating a transpiration barrier that moves moisture from sweat to the exterior of the fiber. By regulating temperature and moisture, Dryarn works to keep you warm and dry even in the harshest conditions.

THERMOLITE

Inspired by polar bears, Invista created this lightweight fiber to provide warmth and accelerate moisture removal from the body. Thermolite combines thermally efficient polymers and hollow core microfibers to do an excellent job trapping heat. Wearing socks made from Thermolite is a much better option than wrapping your feet in fiberglass.

Whether it's stringing together a crisp line in a pillow field or hitting a grass gap created by the spring thaw, shredding is about creativity. The socks in our Artist Series embody this same spirit, sporting the work of folks like Russ Pope. Thanks to our friends, you can now have a mini art museum in your boots.

RUSS POPE  *R. Pope*

Russ's paintings are a collision of motion and color. Needless to say, they provide a perfect fit for art that's made to be worn. Art keeps Russ sane while juggling work in the skateboard industry, raising an incredibly active family, and meeting deadlines for gallery shows. He calls Orange County home and loves being outside with his family. Once everyone else goes to sleep, Russ slips out to his studio to paint. New wave, vintage punk, and old-time blues and jazz fill the air as his brush hits the canvases.

WARNING

Normally, you'd have to buy a canvas to snag a piece by Russ Pope.
